a. General description of your application

　　　Our application is a fashion e-commerce app that focuses on preloved clothing. Our application is named "Kotoda" which derives from our favorite Japanese character and actor. Kotoda was created with the intention of creating a space that empowers women to discover, explore, and express her unique style. Through our application and our online store, they can shop and see all our new collections for the upcoming seasons. Our shop promotes a greener Earth by actively contributing to environmental sustainability. It actively contributes to waste reduction and embraces a more conscious approach to fashion.
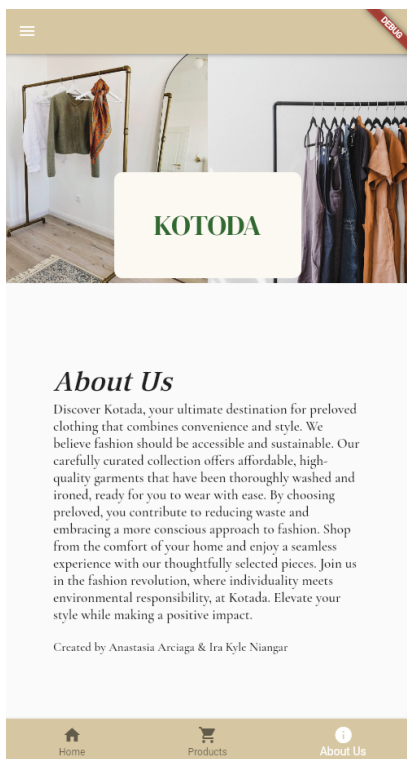

b. List of features
1. Home Screen - The app has a home screen that serves as the main landing page.
2. Sort - The app has a sorting function for the categories of the product.
3. Search Button - The app has a search button to easily find specific products.
4. Navigation Drawer - The app includes a navigation drawer that provides access to different sections of the app.
5. Bottom Navigation Bar - Implement a persistent bottom navigation bar that allows users to switch between different sections or screens of your app.
6. Product Screen - The navigation drawer has a "Products" option that allows users to navigate to a screen displaying products.
7. Contact Us Screen - The navigation drawer has a "Contact Us" option that allows users to navigate to a screen where they can fill out a form to send a message.
8. About Us Screen - The navigation drawer has an "About Us" option that allows users to navigate to a screen displaying information about your company or brand.
9. Add to Cart Feature - allows users to select products and add them to their virtual shopping cart for future purchase.
